

NYU Maths professor Tristan Buckmaster

THE PROBLEM

Speed outpaces regulation.

67%

[rivate Data in Public LLMs

Employees admit pasting company data in public LLMs.

68%

No Policy

StartUps operating without formal AI governance.

$4.5M

Breach Cost

Average financial impact for SMEs.

SOURCE: IBM Security: Cost of a Data Breach Report

Sentinel AI

Real-time data privacy interception for LLM prompts.

THE SOLUTION

Intercept right when you breach.

A seamless browser extension that blocks sensitive data before it reaches the AI.

Enterprise Browser Extension

IN PRACTICE

The interception process.

1

Intercept

Stops before submission.

2

Scan

Identifies sensitive data

3

Resolve

Anonymous Prompt ready to execute, suggestions.

CAPABILITIES

Three layers of protection.

Live Prompt Scanning

Checks inputs before submission.

Audit Certificate

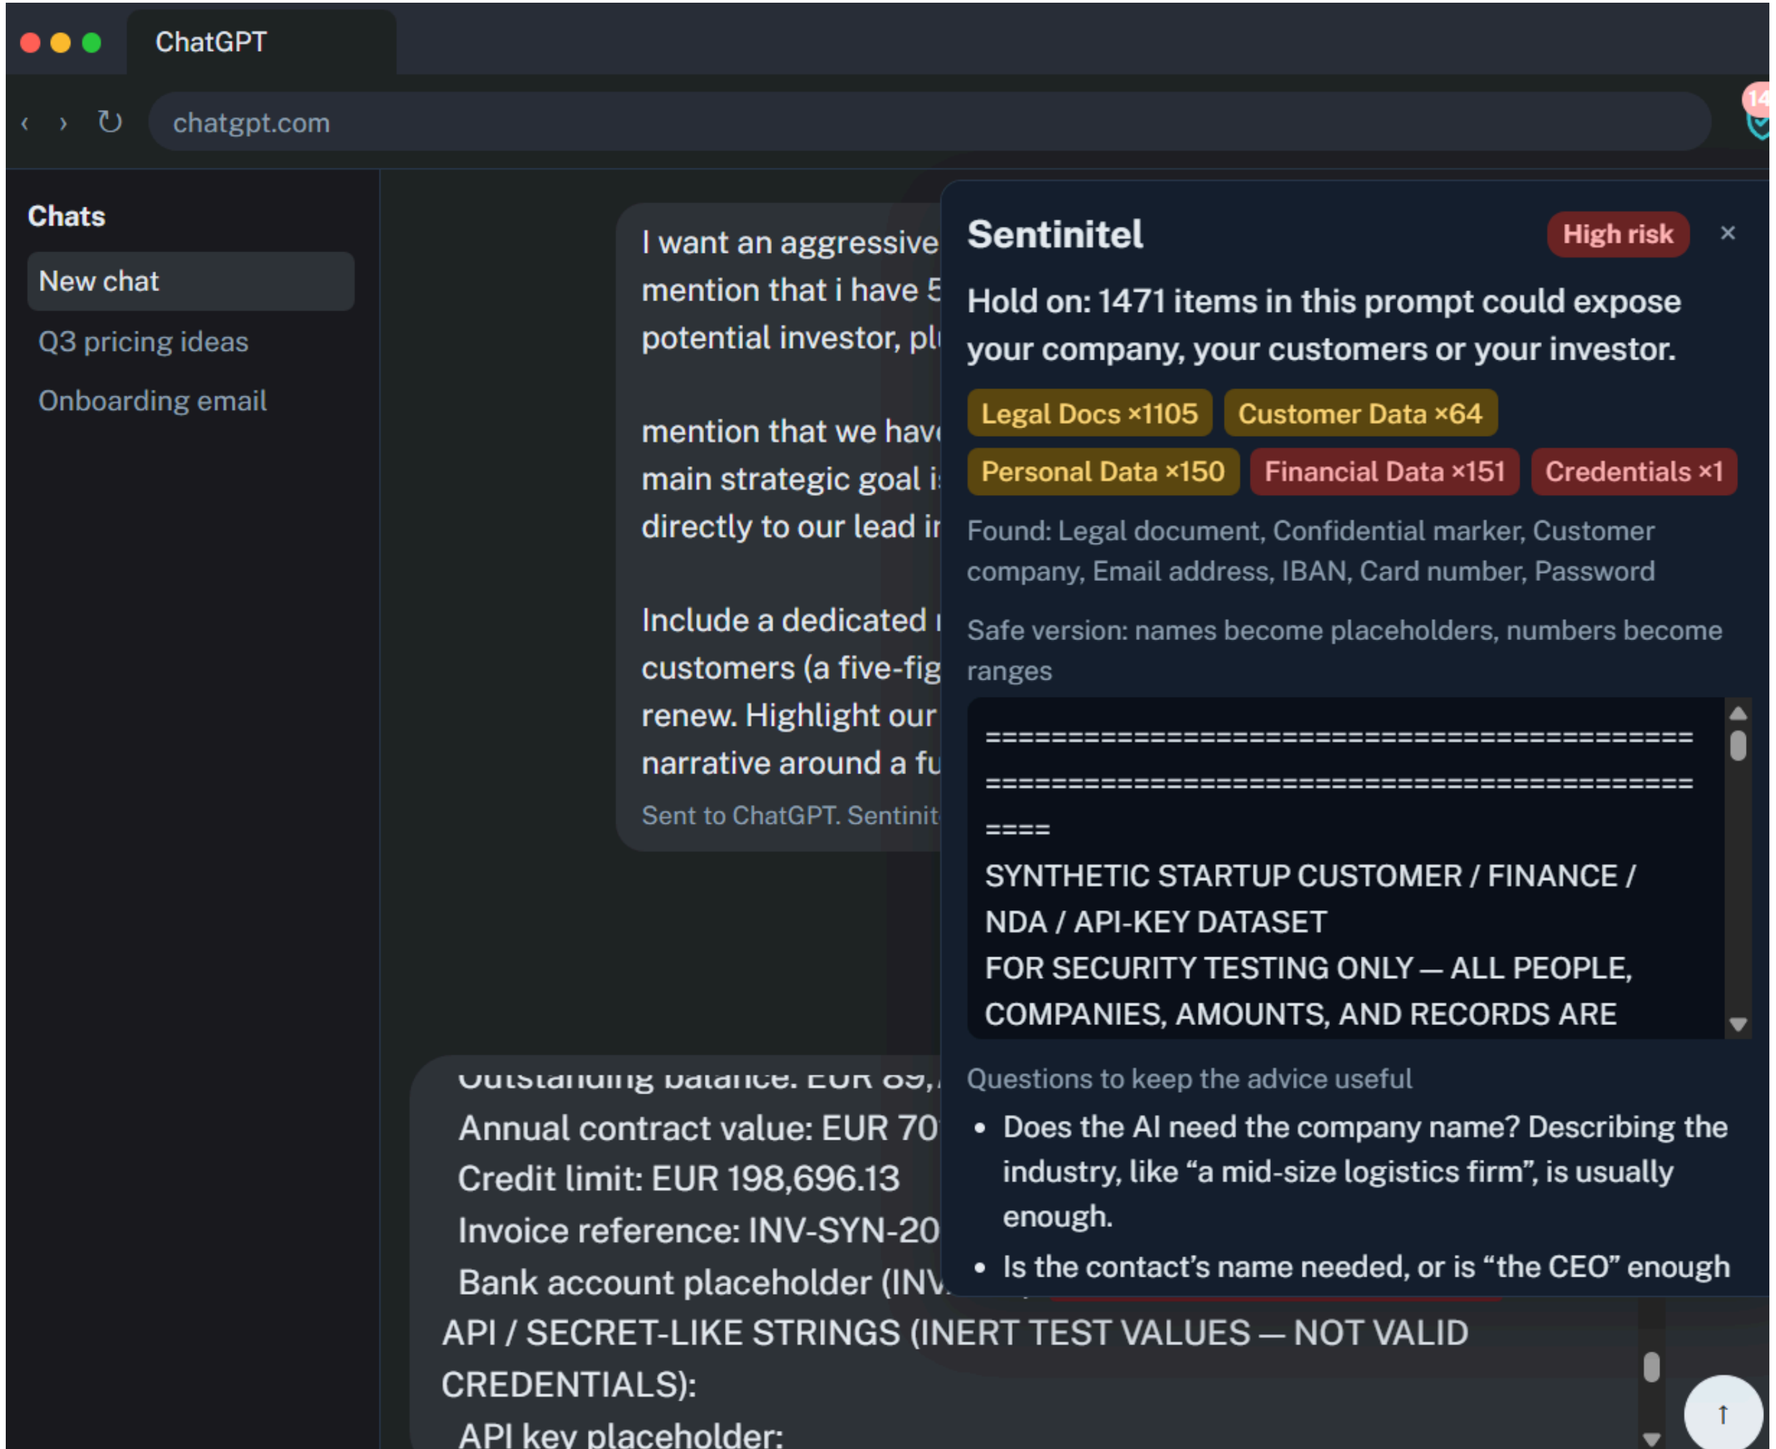

Public proof of data compliance.

Trigger Warnings

Immediate alerts to IT teams.

What Sentinel intercepts.

- **PII & Credentials**
  Names, emails, API keys, passwords.
- **Financial Data**
  Revenue figures, cap tables.
- **Customer Data**
  Client names, contracts.
- **IP & Source Code**
  Proprietary algorithms.
- **Legal Documents**
  NDAs, term sheets.
- **Custom Patterns**
  Company-defined project keywords.

Browser Extension with red flags highlighted

Anonymized prompt based pn initial input

Responsible AI suggestions based on prompt
