Receive an anonymised prompt

## Audit Certificate

Public facing certification that confirms that startup hasnt engaged in any data breach activity

Receive a certificate for your website

## Trigger Warning to IT

Before you press submit, Sentinitel double checks your prompt for data breach privacy

Receive an anonymised prompt

# *What will Sentinel intercept?*

| Category | Details / Examples |
| --- | --- |
| **PII** | Names, emails, phone numbers, addresses |
| **Credentials** | API keys, passwords, tokens, private keys |
| **Financial Data** | Revenue figures, cap tables, bank details |
| **Customer Data** | Client names, contracts, usage data |
| **IP / Source Code** | Proprietary algorithms, unreleased features |
| **Legal Docs** | NDAs, term sheets, litigation documents |
| **Custom Patterns** | Company-defined keywords/regex (e.g. project codenames) |

## *Future Prospects*

for now it is just targeting for the SMEs
and practicality it is acuallly usable
anywhere like hospitals, education
and what not..... fill it up
